Chains, manacles, and the culture of incarceration in eighteenth-century England. The myriad forms of physical restraint available to the eighteenth-century prison governor are beginning to take on a new significance in terms of the social and cultural history of British prisons. This paper proposes that eighteenth-century England did not experience the decline of the medieval prison as some would have it, but rather witnessed the flowering of a criminological culture whose ends were physical debilitation and death. This hypothesis is based on an examination of the development and extent of physical restraint in the eighteenth-century English prison system and on an analysis of those types of restraint which emphasized the desire to reduce a prisoner's physical mobility. Following this, the paper focuses on one particular type of restraint, the stocks, and links that historical practice to the culture of incarceration in eighteenth-century England.Q
