**Men have low self-esteem in relation to the size of their penis and feel most comfortable with a size between 5 and 10cm, research shows. Picture: Getty**

**Most men think being well endowed won't hurt their self-esteem, but losing an erection at the crucial moment is upsetting, a new study has found. Most men have a typical penis size, and this size varies for each man. Too big, however, or too small, can cause some men to feel inadequate and embarrassed. 'More often than not, when we are talking about male sexual satisfaction, we are talking about men being satisfied with their penis size,' study author Dr Laura Carstensen said. She said the body image pressures men felt about having a large penis extended well beyond just whether they're happy with their size. 'Having a smaller penis is sometimes perceived as being deficient, whereas if it's larger it's perceived to be excessive,' she said. 'You can't say these feelings are absolute because self-esteem is relative and you can change your perception of yourself.' In the study carried out in New Zealand, the researchers asked almost 500 men about their penis size. All of the men had a partner, and all the men said they had and were happy to have sex with their partners. But 27 per cent of the men said they'd consider themselves to be sexually attractive, and 19 per cent said they were very sexually attractive. Almost one in five men said they'd consider their penis size as big, extra big or huge. 'If women are saying that it's awesome, the men, in a similar way, seem to know they are, in fact, not,' Dr Carstensen said. 'If they are not, it's a little bit of a problem.' The researchers said while the body image feelings were universal,**

I wrote a simple bash script as follow: `#!/bin/bash  
t=`date +"%Y-%m-%d-%H:%M:%S"` netstat -n -p tcp | grep -v LISTEN | awk '{print $2}' | wc -l echo $t` It returns: 2015-05-03-09:35:53 I'd like to add in the second line to show the current time in a format like this: 2015-05-03-10:35:53. How can I do that? A: You can do it in single line: `t=$(date +"%Y-%m-%d-%H:%M:%S")` or you can use `printf` (not recommended, see below):

---

t="\$(printf "%s" "\$(date  
+ "%Y-%m-%d-%H:%M:%S"))" another way to  
do it with printf is: t="\$(date  
+ "%Y-%m-%d-%H:%M:%S")" t\_str="{t//:/- }  
but you can't use this on scripts that must be  
portable in Linux, Solaris, etc. A: use t=\$(date  
+ '%Y-%m-%d-%H:%M:%S') EDIT: if you want  
to use only
