This is an experimental student showcase project that was initially created to help us improve the visual quality, polish the interface and content (story, items, world), and hopefully have fun developing it. The project includes a full prototype of the game and the visual assets related to it. The project is still in a very early stage of development, and only has the visual assets related to the concept and the mechanics (3D models and animations, textures, etc). The project is being developed in Unity. There are no final art assets or music, but the project has a dramatic and classic neo-noir storyline, with references to Japanese culture. We have some playable testers and some cool video of our game. I invite you to have a look and give your opinion. We'll admit it, sometimes games will give us opinions and values that we don't necessarily agree with. Strong headed individuals will deny values they don't agree with, and often times these will be portrayed as bad for other values, but what if we were to point out which were actually bad? If we live in a society where only the strong survive, what happens when the brave abandon their values? In the next video, we'll discuss the bold and brave strategy of Taiyo... and how it can be used to achieve our goals and conquer our monsters. Source... For members of the community we'll admit it, Samurai World's a little buggy! But this is just a bug we're correcting. The last version was also buggy, but on a much larger scale. We hope you'll forgive us while we make it even better. We're doing all we can to making this as bug free as possible and for the next update. Let us know if you encounter any and we'll make sure they're correct. Every patch will also correct any and all missing content by adding it to the block list. We hope you'll join us in this journey so

A noble and bizarre quest unfolds throughout this colorful and surreal graphic adventure. In the year 2022, after a long political and social crisis, the world has been divided into two parts: the rich area (towards the top) and the poor area (towards the bottom). The point-and-click adventure is famous for its witty dialogues and has been constantly rebooted in the past decades. Thus, it's never a good idea to fall into the trap of stereotypes. There are other things to worry about at home, namely creating your own family, managing your personal finances, saving for your retirement... Max is a young programmer in the great city "Evolution". He is a smart and daring guy, but with his own mediocrity. He lives in a tower with his parents and has trouble to say something to them. He doesn't want to stay like this forever, he has one goal in life: to become rich. He can help himself by befriending people, which can tell him valuable information about important events of the day. One day, Max comes across the Grafton Virtual Technologies, a startup that offers a new form of "personal computing". The CEO of GVT himself is an established magnate named Quentin, an easy going gentleman who hates to feel inferior to others. He is the first one to see the advantages of the new technology. Unfortunately, Quentin is the victim of his own technology, and will discover this the hardest way. Max is asked to become the Computer Assistant of Quentin, in exchange of a 3-months salary. Max, a geek at heart, agrees. During the course of the adventure he will earn money through programming chores and will accomplish new meaningful tasks, at the same time he will have to fight evil intergalactic robots and unplanned tasks for the famous wealthy society. If you are ready to accept a new challenge, go ahead.
