Hello guys, I've been playing fallout new vegas until it was version 1.4 and now I want to play it with (if possible) the trainer 1.4.0.525 is there any program to load the trainer? I know is an old and silly question but I had no luck. Thanks in advance. A: You need to download the trainer from the repository file, save it to you hard drive and add the trainer as an.exe file. Nvidia drivers are required to use the trainer, and the latest can be downloaded here. Windows 7: To start the trainer right click on the trainer file and select open with, and then select the "Choose application." You can also use Firefox, Chrome, Internet Explorer or any other browser to open files but you need to select the correct file type for the file. If you are not playing on Windows 7 or Windows XP, you can use a free alternative and that is Choco.apk file manager. # RUN: yamI2obj %s > %t # RUN: llvm-objdump -S -no-show-raw-insn %t | FileCheck %s # CHECK: SUBALIGN_0x01 # CHECK-NEXT: 0000018E # CHECK-NEXT: .space 4 # CHECK-NEXT: 01004EE9 # CHECK-NEXT: .space 4 ---!mach-o FileHeader: magic: 0xFEEDFACE cputype: 0x01000007 cpusubtype: 0x80000003 filetype: 0x00000002 ncmds: 2 sizeofcmds: 612 flags: 0x08000003 reserved: 0x00000000 LoadCommands: - cmd: LC_SEGMENT
