They are manufactured in almost every nook and corner of the state, from Santhal Parganas to Murshidabad, from Digha to Birbhum, every step of the way boosting the state's economy. However, in recent decades, West Bengal's textile industry has declined, and as a result, a lot of issues have arose related to the sector. But the industry still remains a significant part of the state's economy, with the textile industry paying more than Rs 21,000 crore annually. The real story is not about a single textile industry in the state but thousands of factories spread across several districts, which together contribute to the state's textile industry. However, no city in the state gets an equal share in the state's textile industry. In such an event, Kolkata heads the list among the cities of the state, followed by a little-known small town called Nadia. Even in Rourkela, a prosperous industrial town of Odisha, more than 5,000 workers are employed in the textile industry, which means almost 17% of the work force of the district is associated with the industry. And though almost a third of the Indian population is engaged in the textile industry, West Bengal accounts for more than 40% of the country's textile industry, according to data released by the government of West Bengal. What's new:

Diner Mania, also known as Get Down Saturday Night, is a DVD released by NBC on June 15, 2006. It is a collection of live performances and shows from the NBC Saturday Night shows, namely Saturday Night Live, The Saturday Night Show and The Saturday Night Movie. It includes skits and all of their most popular songs from the three shows. It was on sale for one month before going back to newsstands, and it cost \$29.99. Opening the show in New York City, SNL's famous "Weekend Update" segment gave its faux "Persons of Interest" mini-props to NBC's 2006 Olympics coverage, announcing that skater Dorothy Hamill and carpenter/guitarist Mick Jagger will lead the USA in their respective events. Three musical numbers (2 by Grease!, "Look Around" by Starsky & Hutch and "Al G'ma Do It" by the Harlem Globetrotters) closed the show. DVD release When it was first released by producer Bruce Vaughn, on June 15, 2006, it came with 240 songs from these three shows as well as photos of the cast and a rendition of the show in Philadelphia. It also came with highlights from SNL in Montréal. There are no edits. It retailed for \$29.99. God is a Cube is a puzzle-platformer game where you play as the robot God, and you have to find the cube's solution to prevent his existence from being destroyed by the magic cube. About The Game: God is a Cube is a puzzle-platformer game where you play as the robot God, and you have to find the cube's solution to prevent his existence from being destroyed by the magic cube. In the game, you play as the God, a robot that has been turned to dust by a cube containing the void symbol. In order to put back his existence, the God has to move the cubes and find the solution to a complex puzzle set by the cube. The God has full mobility: he can move the cubes he touches, and he can even manipulate the spaces around them, but he only has access to the current cube of the level, as well as the cubes adjacent to it. The God also has only 4 tools, and they have to be used in order to solve the level, or to manipulate it. An ability called Vexus (V for void) allows the God to rearrange the cubes and to place them in any location. Finally, the God can be damaged by the cubes if he moves them too fast, and some cubes might be also destroyed if they are not linked by a way. All cubes have their own keypad that the God can use to perform the possible actions on the cubes (e.g. "Up", "Left", etc.). What you really have to accomplish is to break the cubes in the right order, so you may need to use a combination of actions to solve the level. To play, go to the menu, choose a level, and then click on the "Start" button to begin. Remember to deactivate all level hints that may appear at the beginning of the game! You will know when a hint is activated. God is a Cube is being developed since November 2014, it is currently at version 0.5 (final release is planned in February 2017, so download and try it now if you want to see the latest development version). This is an early version, so it has some bugs, and many aspects are still work in progress. God is a Cube is a puzzle-platformer game where you play as the robot God, and you have to find the cube's solution to prevent his existence from being destroyed by the magic cube.
