LazarusMinimum Sep 22, 2012 From here it'll be on Steam. daveplusplus46 Oct 17, 2012 I have no intentions of buying this game on steam as I have not been impressed with any games from the Beyond Entertainment brand. I have always wanted to like Beyond Entertainment games after the FF14 series and they just have never

captured my interest. I don't know why they even bother getting them published if they aren't going to do anything with it. spdy76 Oct 20, 2012 \* Hi everyone just playing ARPG\* Currently on 20 active servers\* I have to say that overall i am very impressed with the game. -The graphics are detailed, the bosses are great and some of them are outstanding. -It's a really interesting world. -The gameplay is what matters. -Sadly it's quite slow. -The dungeons are very spacious, that adds to the fun, other than that the dungeons are not particularly challenging. -The skills you get are very varied, from weapon skills, magic skills, dark arts and the trait tree which are very fun. -There is a focus on blocking and timing attacks rather than chaining multiple attacks, it makes attacking a lot more fun. -The difficulty is reasonable, however there's very little loot and enemies between you and the next boss. -You can have a lvl 20 character and still feel like a neophyte. -The plot however is what makes this game special. -I don't want to spoil it for you but there is plenty of story. -The soundtrack was very good and very fitting for the game. ZapakMinimum Oct 22, 2012 This game is the successor of AE, and after playing the demo I can say it's the best game Beyond Entertainment has ever made. It's very enjoyable and you can be a lot of fun. MantalasMaximum Oct 29, 2012 This game is amazing. I played the trial about 20 hours and now it's about 40 hours. - The graphics, in my opinion, are more detailed than the last games made by Beyond Entertainment, and I like that. - The music is good and fits great, never have I heard a soundtrack so good. - The game-play is really amazing.
