while we were creating user profiles, we also wanted to incorporate something that hadn't yet been put to good use: our new activity feed. since the beginning of ls online, our activity feed has been something that players left as an optional feature. we felt that this was because the activity feed was a secondary aspect of the game, so many players probably would have played regardless of whether or not the activity feed was there. however, many of our players expressed a desire for a more prominent role for the activity feed, and we finally decided to give it that role. this has been a great addition to the game because it lets players see what everyone else is doing in real time, along with pictures of their friends, posts, and activities in a clear and informative way. we are also excited to announce that we have opened our feature request forum to our players. this is a forum for players to share ideas about what they want to see in future versions of ls online. tell us what features or tools you want to see, or what you have found to be a pain point about the current game. alafaba+a is the new experience for the world's most innovative designers, showcasing the latest collections from the world's most coveted, forward-thinking brands. the timing for this is perfect, for both the dfw market and the event itself. the fashion is fresh and the spirit is global. imagine.. imagine if people within your immediate surroundings were dropping by to see you in your home. thats right! were all over the world, checking in to let you know were here to provide amazing solutions to a variety of challenges. 5ec8ef588b
